DIG PROFITS ARE MADE BY LEASERS

Crowther Leasing Company Is Paying Small Fortune to Its Shareholders.

TWENTY-FIVE CENTS

Successful Work on Ontario Property Brings Cash to

Local Pockets.

Tounded the organization, and it paves the way for an energetic campaign of development work soon to be commoneed. About 5 per cent of the argest dividends per month of any similar company in the state of Utah. I refer to the Crowther Leasing company, an organization of fortunate Salt Lakers, a corporation so close that the world knows absolutely nothing about what the company is doing or the successes that have crowned its efforts. cesses that have crowned its efforts from the very beginning of activity," said a prominent Park City operator on Monday. He said that the camp was proud of this lease, and wonders why the local papers have not pounced

why the local papers have not pounced on the story long ago.

The Park City man continued:

"The Crowther company is operating a block of ground on the Ontario estate, a section which has been worked in years past by the original company. In the old workings and in untouched portions of the leased ground considerable good ore is being uncovered, much of which is being shipped to the Salt Lake smelters at the rate of \$10,000 to \$20,000 per month. Just recently the company installed a small mill, which turns out four tons of concentrates and one ton of slimes per day. For at least two, and perhaps three, months, the company has been distributing profits to its shareholders. The company is capitalized for 10,000 shares of stock, and 25 cents a share per month is the dividend paid. I think that is about the banner rate of dividends for the state. And it is pretty well understood at Park City the the control of the state.

dends for the state. And it is pretty well understood at Park City that the net earnings of the company are het-ler than the dividend by 50 per cent. "During recent years in Nevada, the

"During recent years in Nevada, the leasing system has been about all that has maintained the majority of mining camps, and we all know that it made the Goldfield district. There often are mining properties which present ideal leasing propositions where company effort would fail in making a satisfactory profit. These conditions prevail in the case under discussion, and I believe there are many other properties. in the case under discussion, and I believe there are many other properties in the big camps of Utah which could afford to encourage leasing of a portion of their domains. The Crowther lease is an illustration that it sometimes pays to go over ground that has been skimmed."

JESSE KNIGHT PLEASED WITH BEAVER COUNTY

David Evans and Jesse Knight, offi-clais of the Indian Queen and King Da-vid companies of Beaver county, are back from an inspection of these mines. This was Mr. Knight's first visit to the prop-erties, and Mr. Evans says that he was very much pleased with them. At the In-dian Queen they found the long tunnel noking its way into very interesting and promising territory, while at the King David mine the shaft still keeps going into formation liberally peppered with lead sulphides. This shaft is down 430 feet, and these sulphides have been pres-port for the last sixty feet or more. The transgement is developing the same char-acter of rock on the 260-foot level.

THOMPSON-WEST QUINCY CONFERENCE ON MONDAY

Another consultation between the officials of the West Quincy and the Thompson Mining companies was held Monday morning in the effort to bring the terms of consolidation within the limits of expectations of every one connected with the two propositions. A prominent official of the Thompson company said vesterday that the various interests were no nearer a solution today than they were two years ago, but every one had hoper that the terms soon would be agreed on. "We still are sparring for an agreement," he said, "but we have not gone far enough yet to reach a definite basis, and any reports to the contrary are incorrect."

PIOCHE KING COMPANY GETTING NEAR RESULTS

The superintendent of the Pioche King company of Pioche has reported a very significant condition of affairs to the Salt Lake officials of the company. On the 190-foot level the management has two drifts out, the one to the east being 170 feet from the shaft, the western drift being 150 feet from the shaft, in each face there is coming in a fine change in formation, quartz and manganese in abundance being present. The superintendent says that these conditions look extremely sood to him, and inside of the next fifty feet he predicts results of much importance. Results, therefore, can be expected within a short time, as five feet per day is the progress being made in this work.

CHINO COMPANY PICKS OUT OFFICIAL BOARD

From Boston comes the word that the permanent officials of the Chino Copper company have been selected. The directors are D. C. Jackling, A. Chester Beatty. Charles MacNelli, Spencer Penrose, Charles Hayden, Sherwood Aldrich, W. H. Smith, J. G. Honkins, H. M. Whitney, Eugene N. Foss, B. Rochschild and Samuel Sloan. The first six are directors of the Utah Copper company. The executive committee of the Chino will consist of Messrs, Jackling, Aldrich, MacNelli, Beatty and Hayden, Mr. Beatty, who is consulting engineer for the company also, reports that the Chino company has 4,000,000 tons of copper ore developed, and 5,000,000 tons partially developed.

I will not be responsible for any debts contracted by anybody but my-self. L. D. SINCLAIR.

EMMA COPPER ALTERS ARTICLES ON MONDAY

Company Will Assess Stock and Resume Operations Without Delay.

At the special stockholders' meeting of the Emma Copper company, held Monday afternoon, it was decided to A SHARE PER MONTH amend the articles of incorporation so as to make the stock assessable. This favorable action by the stockholders is a long step forward toward solving the financial difficulties which have sur-rounded the organization, and it paves

> his or her share, for the proposition is going to become one of the live ones of the state. Such prominent share-holders as Samuel Newhouse, D. C. Jackling, C. W. Whitley, John A. Kir-by, the Freed interests, the Peery es-tate and others, he states, are willing to do their share in making the Emma Copper company an active and successful organization.

PARK CITY ZING MILL DOING SPLENDID WORK

Visitors to Park City notice that the zine middling dumps of the Daly Judge Mining company are diminishing fast, due to the splendid work of the Grass-celli Chemical company's concentrating plant which was installed last year. When this new mill was installed, the dumps of the Daly Judge company held approximately 15,000 to 25,000 tons of zine middlings, and it is said that almost half of this ionnage has been sent into the plant. The mill is a dry concentrator, the secret of success lying in the screening devices. The plant is ideally adpated for the work in hand. At present an average of sixty ions per day is being handled, and the degree of efficiency developed is agreed by those who know to be fullly up to expectations in every regard.

Utah Mining Man Believes That Alaska Is Mecca for Industrious.

"I doubt if there is a wider and more fuitful field for the young man who is willing to endure hardship with practically certain generous returns as his reward than Alaska. The resources have not been touched even in the most developed sections." said F. W. Barney, a well known mining man who has operated extensively throughout Utah and Nevada. Mr. Barney has just returned from Nome. Alaska, where for several weeks he has been examining placer properties for capitalists of Milwaukee. Nome, he states, still retains an abundance of gold, and as an evidence of his conviction to this effect, Mr. Barney expects to return to this camp on the northern seas soon with a complete gold dredging outfit.

"Nature certainly was profuse in her distribution of the yellow metal throughout Alaska," said Mr. Barney, but nature certainly selected some peculiarly was an injunction was selected the rich chute at a depth of 327 feet, and crosscutting has been started in the same. Recently the company posted a dividend of 5 cents per share, or \$50,000, but owing to some legal compilications an injunction was selected some peculiarly was profuse in her distribution of the yellow metal throughout plants are not confined to the surface is evident from the strike just made on his lease. The management has encountered the rich chute at a depth of 327 feet, and crosscutting has been started in the same. Recently the company posted a dividend of 5 cents per share, or \$50,000, but owing to some legal compilications as injunction was sellenged to proposition.

When seen by The Tribune, Mr. Smith admitted that he was in hopes of finding a market for some of his officing a market for some of his ore in Salt Lake City. The company has been shipping steadily since last November, and the present rate of shipping steadily since last November, and the present rate of shipping steadily since last November, and the present rate of shipping steadily since last November, and the present rate

of his conviction to this effect, Mr. Barney expects to return to this camp on the northern seas soon with a complete gold dredging outfit.

''Nature certainly was profuse in her distribution of the yellow metal throughout Alaska,' said Mr. Barney, ''but nature certainly selected some peculiarly weird and unfavored spots otherwise for her work. Nome, for instance, without a tree in sight or in reach presents gold immediately beneath the spraydashed tundra, and it has taken considerable ingenuity on the part of man to properly equip himself for the task of rescuing the nuggets and golden dust from the soil.'

Eleven years ago Nome was nothing

From the soil."

Eleven years ago Nome was nothing more than a named cape, the bare and bleak shore affording no more promise of golden riches than hundreds of miles of other coastland of Alaska. Mr. Barney says that the discovery of gold at Nome illustrates the possibilities of the teartiery the great area of which the territory, the great area of which lies undiscovered, to be unsealed by ad-venturesome spirits who are willing to stop at no impediment nature can pro

BOSTON-SUNSHINE TO PAY SECOND DIVIDEND

"The Boston-Sunshine milling plant is a complete success, making as good a record as we had sinticipated. It is just about the finest little mill I ever saw in operation anywhere," said George H. Dern, general manager of the company. Mr. Dern had just informed The Tribune representative that this organization had posted its second monthly dividend, having started profit sharing in July.

The amount of this dividend is two cents per share aggregating \$3000, and is payable immediately. Inasmuch as there are not over five or six stockholders in the company, not so many that a severe struggle ever will be probable at election times, and the stock is held lighter than a drum, the affairs of the company easily are transacted, and at dividend periods it takes a very few minutes to wind up the matter.

MAY DAY SINKING FROM THOUSAND LEVEL

The May Day management is diligentive sinking from the 1900-foot level to the 1900-foot level in order to get at the new ore body. John Dern stated vesterday that the work on the 1000 level was done right on top of the ore, the body coming to a point in the top of the drift, but a little lower where a crosscut was driven, the ore was twenty-four feet in extent. The officials expect with another hundred feet of depth to open one of the banner ore bodies of the property.

UNCLE SAM PROPERTY IN PROMISING SHAPE

"We never knew the Uncle Sam property to hold so much promise as it does today, and I believe that the near future will find the property showing a decided improvement in many ways." said James Chipman yesterday, one of the directors of the company, and who keeps in constant touch with the mine. The management is in hopes that the quality of the Uncle Sam ores will show a betterment with development work, although the present value of the same easily is within the shipping class.

Mining Notes.

Sam Levy of the National Development company has returned from the mines of Beaver county. James E. Beveridge, superintendent of the Consolidated Flagstaff company, is in the city from Alta.

General Manager Tony Jacobson of the Columbus Consolidated is in the city after several days at the property J. C. Sullivan, a well-known operator of Eureka, is in the city, a guest at the

George St. Claire, general manager of the Lion Hill Consolidated, is in the city to attend to the disposition of two cars

Lewis S Cates and father and C. C. Parsons, sr., have left for a trip through Yellowstone park.

Superintendent Charles Elliothorpe of the Seven Troughs Mining and the Seven Troughs Florence companies will leave for the camp today Mr. Elliothorpe has been selling some rich silver ores from these two Seven Troughs propositions in the local market. the local market.

the local market.

Secretary Callbreath of the American Mining congress is in the city consulting with Harry S. Joseph and others prominent in the congress in regard to the programme for the coming session at Goldfield. The officials and members of the congress expect the Goldfield session to be one of the most interesting in its history.

Take Notice. All persons are recommended to take

Foley's Kidney Remedy for backache, rheumatism, and kidney and bladder trouble. It will quickly correct urinary irregularities, which, if neglected, may develop into a serious illness. It will restore health and strength. Do not neglect signs of kidney or bladder trouble and risk Bright's disease or diabetes. F. J. Hill Drug Co., 80 W. 2nd South.

INNES' BAND AT SALTAIR Friday, Sat., Sun., Aug. 20, 21, 22, Two free concerts daily; 60 men. Sev-eral soloists. Very fine.

For Sale.

Most People Desire

A Dependable

Newspaper

Hence, if those former Herald subscribers who find themselves without a newspaper, will send us their addresses, we will be pleased to send The Tribune to them regularly. The Tribune is every inch a newspaper; in fact, the only real newspaper in the morning field. Gives the full Associated Press, the most complete city, state and intermountain news service. You will find

The Tribune

a dependable newspaper every day of the year, and you will not find it hot one day and cold the next. Whether you agree or not, you know where to find it, and you will admit that The Tribune is far and away the strongest factor in newspaperdom in Utah. Get the best by sending your address to The Tribune.

SEND FOR THE MAP OF PIOCHE, NEVADA learn about a camp which has recently opened several big new mines is shipping regularly. The comportunities at Pioche are exceptionally and it will pay you to get acquainted with the camp at once. We do be giad to send you the map and information without cost. R. K. COBB & CO., SALT LAKE CITY, UTAH.

Orders promptly executed in all markets.

NEW COMPRESSOR FOR DALY-JUDGE COMPANY

Getting Ready for Greater Activity at Mine of Park

R. T. Mason, superintendent of the Daly-Judge Mining company, is in town from Park City for the purpose of con-Lambourne in regard to the purchase of new equipment. The company during the present week will secure a new compressor, which will give double the present compressor capacity of the com-pany. The management will utilize elec-tric power with this new machinery, substituting it for steam. This purchase will mean that the company will do twice the amount of development, and twice the amount of work in ore, as

Mr. Mason stated yesterday that the
Daly Judge property was in a very
gratifying condition. He is making ar rangements to begin development work on the 1500 foot level within the next few days, as the water has receeded sufficiently to allow miners to work at that depth. The level became closed with water last May. The work on the 1500 level will be in ore partly, while drifts will be continued for new resources.

Chamberlain's Colic, Cholera and Diarrhoea Remedy Never Known to Fail.

"I have used Chamberlain's Colic. Cholera and Diarrhoea Remedy since it was first introduced to the public in 1872, and have never found one instance where a cure was not speedily effected by its use. I have been a commercial traveler for eighteen years, and never start out on a trip without this, my faithful friend," snys H. S. Nichols of Oakland, Ind. Ter. For sale by all druggists.

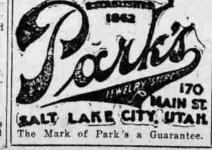

PUBLIC CHARACTERS have attained prominence by

both virtues and vices and so it is with everything else. "That Good Coal" is a byword in Utah, lots of people like it for making fires, that's what it's famous for.

BAMBERGER 161 Meighn st., U. S. A.

All works of taste must bear price in proportion to the skill, taste, time and material used in their design and manufacture.

Things called "dear" are, when justly estimated, the cheapest. These are axioms that apply to our jewelry and justify our "reasonable price."

Fine Engraving

some do not yet know that we his work in our own shop, and so tal heir work to other stationers, who see it away to be done. Our work is better. Why not ins

on the work being done in Salt Lake-or bring it to us direct? Why not pull for Salt Lake?
